ClearView[®] Disposable Sound-Dilator

Accurate uterine depth assessment. Gentle dilation of the cervix. One simple device.

ClearView[®] Disposable Sound-Dilator is a single-use, double-ended sound dilator for use in laparoscopy or hysteroscopy involving the female pelvic organs when sounding of the uterus or dilation of the cervical canal is indicated.

Key Features and Benefits

- Easy-to-read centimeter markings on both ends for accurate sounding and safe dilation with one device
- Small diameter and rounded tips for procedural comfort
- Flexible, molded plastic with curved design follows natural shape of the cervical canal
- Sterile, single-use
- Latex-free
